

Spike Barrier

For High Security Access Control

We have designed to provide a compelling reason for would-be criminals to reconsider their Approach . There are two types of categories:

Flush Mount models for installations that are flush with the roadway surface; and Surface Mount models for installations that are mounted above the roadway surface. The Flush Mount models are ideal for installations that require seamless access control for smooth-flowing traffic.

Surface Mount models are mounted above the general surface of the roadway and create a traffic calming bump, slowing traffic for a safer access control point.

Technical Details

Spikes Raise/Lower Time	2 sec
Spikes Module height	4 ~ 6 inch
Voltage	AC 230V - 50Hz
Working Temperature	-15 degree to 55 degree
Above Ground Height	6~ 8 inch
Protection class	IP 54
